PRODUCT DESCRIPTION:

XF501 Defined Endothelial Cell Growth Kit is a complete medium for the optimal growth of endothelial cells from large vessels. The kit contains a medium with essential and non-essential amino acids, vitamins, organic and inorganic compounds etc. Additionally the kit contains an optimized combination of growth factors, hormones and a growth supplement.

By using this kit for the growth of endothelial cells there is no need to use FBS or other sera. All components in the kit are free of animal and/or human derived materials.

The XF501 Defined Endothelial Cell Growth Kit is for in vitro research applications only.

CAT NO.: XF501-0500
KIT CONTENT: 500 ml medium + separate vials with supplements
